

Moaz Shahin (Cody Axton)

Systems & Automation Engineer | Technical Operations

Egypt (Remote) | codyaxton@outlook.com | [Portfolio](#) | [GitHub](#) | [Upwork Profile](#)

SUMMARY

Systems & Automation Engineer with 6+ years of experience designing scalable digital ecosystems, custom CRM architectures, and high-volume data workflows. Specializes in building reliable backend pipelines, direct-response web infrastructures, and cross-platform integrations using modern API and automation tools. Experienced in overseeing technical delivery from initial schema design to deployment and reliability monitoring.

TECHNICAL STACK

- **CRM & Marketing Systems:** GoHighLevel (GHL), Custom Pipelines, Triggers, Webhooks, Calendar Systems, Smart Lists.
- **Integration & Logic Engines:** Make (Integromat), n8n, Zapier, REST APIs, JSON Parsing, Error Routing.
- **Web & Data Infrastructure:** Supabase, PostgreSQL, React, TypeScript, Tailwind CSS, Vercel, Netlify.
- **Operations & Protocols:** Meta Pixel Server-Side Tracking, DNS/Domain Records, Email/SMS Gateway Delivery, QA Protocols.

EXPERIENCE

Lead Funnel Engineer & Systems Architect — Fusion 44X

2026

- Architected full-funnel web application backed by Supabase schemas and custom performance dashboards.
- Implemented server-side attribution and Meta Conversions API to ensure zero data drop across user touchpoints.
- Constructed instant multi-channel webhook triggers for lead capture, calendar booking, and CRM updates.

Platform & Systems Architect — LingoVantage

2025 – 2026

- Built end-to-end LMS infrastructure featuring tiered student portals, automated auth, and admin controls.
- Engineered multi-channel dispatch pipelines connecting placement exams to Telegram and WhatsApp notifications in real time.
- Designed and deployed auto-grading workflows and assignment submission pipelines, eliminating manual operational bottlenecks.

Automation & CRM Architect — GMC LLC

2024 – 2026

- Developed full technical foundation across GoHighLevel, n8n, and Make for lead acquisition and customer operations.
- Designed and deployed conversion funnels with automated checkout, upsell logic, and dynamic lifecycle notifications.
- Structured CRM pipelines, tagging schemas, and custom fields to maintain clean data integrity and high email/SMS deliverability.
- Handled pre-launch testing, domain/DNS routing, and edge-case handling across webhook failure points.

Automation Consultant — Tadarab

2025

- Built complex multi-branch routing scenarios in Make handling high-volume lead qualification and dynamic communications.
- Designed pipeline validation tests to maintain zero message loss across large distribution batches.

Founder & Technical Lead — Mortal VA

2023 – Present

- Founded and led a digital operations firm providing custom CRM workflows, AI automations, and web solutions.
- Managed project scoping, technical milestones, and quality control across 15+ international client deployments.
- Deployed AI-driven voice and chat agents integrated with scheduling pipelines and lead capture forms.

Operations & Pipeline Lead — Total Post N Print

2024 – 2025

- Managed daily operational pipelines, customer lifecycle systems, and billing workflows.
- Streamlined handoff processes between incoming orders, technical fulfillment, and customer support.

Outreach Specialist & Campaign Coordinator — Wholesale Real Estate & Solar

2019 – 2022

- Orchestrated outbound acquisition campaigns and managed high-volume lead pipelines across direct markets.
- Analyzed call metrics and conversation funnels to optimize qualification workflows.

SELECTED ACHIEVEMENTS

- **System Reliability:** Architected 15+ scalable automation infrastructures achieving 30-40% operational efficiency improvements.

- **Technical Delivery:** Successfully launched 6+ complex web funnels and LMS portals with custom backend integrations and zero launch data loss.
