

Moaz Shahin (Cody Axton)

Tech Manager & Automation Architect

Egypt (Remote) | codyaxton@outlook.com | [Portfolio Website](#) | [GitHub](#) | [Upwork Portfolio](#)

PROFESSIONAL SUMMARY

Hands-on **Tech Manager & Systems Architect** with 6+ years of experience leading end-to-end technical delivery across GoHighLevel (GHL), Skool communities, Make/Zapier, and high-converting funnel ecosystems. Combines deep hands-on workflow engineering with team oversight, sprint planning in ClickUp, and rigorous pre-launch QA. Proven history triaging breakages, managing technical personnel, writing operational SOPs, and architecting fail-safe multi-channel lead and payment pipelines that protect client launch deadlines.

CORE COMPETENCIES & TOOLSET

- **Management & Delivery:** Technical Project Management, ClickUp Sprint Tracking & Resource Allocation, Pre-Launch QA Checklists, Operational SOPs, Team Mentorship & UAT.
- **CRM & Community Systems:** GoHighLevel / GHL (Workflows, Smart Lists, Pipelines, Calendars, Forms, Webhooks), Skool (Onboarding Paths, Access Control, Portals).
- **Integrations & Automations:** Make (Integromat), Zapier, n8n, Custom Webhooks, REST APIs, JSON Payload Parsing, Error Handling & Safeguards.
- **Lifecycle & Conversion Tech:** Email & SMS Deliverability, Payment Gateways (Stripe), DNS & Domain Hygiene, Meta Pixel & Server-Side Event Tracking.

PROFESSIONAL EXPERIENCE

Lead Funnel Engineer & Systems Architect — Fusion 44X

2026

- Architected and deployed direct-response funnel ecosystems backed by Supabase database schemas and real-time operational metrics dashboards.
- Engineered full Meta event tracking with per-session lead attribution, custom parameters, and automated post-submission SMS/email routing.
- Standardized pre-launch QA checklists across domains, DNS records, and webhooks to eliminate payload dropouts and tracking discrepancies.

Platform & Systems Architect — LingoVantage

2025 – 2026

- Engineered student membership platform and tiered course portals with automated role-based access control and backend admin tooling.
- Constructed automated registration pipelines dispatching real-time transactional alerts across Telegram, WhatsApp, and email via webhooks.
- Developed structured user onboarding paths, auto-graded placement workflows, and submission protocols, eliminating manual administrative intervention.

Tech Lead & Automation Architect — GMC LLC

2024 – 2026

- Owned end-to-end technical delivery across GoHighLevel, Make, and Zapier, managing task delegation, timeline estimation, and pre-client QA.
- Directed the design and launch of an integrated funnel ecosystem (book-a-call, upsell/downsell, webinar, and high-ticket sales flows) integrated with dynamic payments and multi-step SMS/email lifecycle messaging.
- Enforced environment hygiene across CRM smart lists, custom fields, tagging topologies, DNS records, and domain routing to maximize deliverability.
- Built fail-safe webhook error-handling scenarios in Make and created reusable launch checklists and internal SOPs to accelerate client onboarding.

Technical Automation Consultant — Tadarab

2025

- Architected multi-branch language routing pipelines and CRM workflows handling thousands of leads across dynamic email/SMS templates.
- Conducted end-to-end payload validation, edge-case testing, and pipeline safeguards to ensure deliverability across high-volume broadcast funnels.

Founder & Technical Delivery Lead — Mortal VA

2023 – Present

- Managed a remote technical team delivering automation, CRM architectures, funnel integrations, and AI deployments for global clients.
- Steered daily task boards and sprint priorities in ClickUp, eliminating dependency bottlenecks and ensuring launches shipped on schedule.
- Conducted pre-client UAT and flow reviews across 15+ client projects, catching logic and payload edge cases prior to deployment.
- Mentored technical personnel, instituted performance benchmarks, and defined role responsibilities to optimize team execution bandwidth.

Operations & Pipeline Lead — Total Post N Print

2024 – 2025

- Managed client relationships and technical workflows while coordinating invoicing, fulfillment support, and cross-team dependencies.
- Mentored incoming team members on CRM pipeline management, support protocols, and quality standards.

Lead Generation & Direct Outreach Specialist — Wholesale Real Estate & Solar

2019 – 2022

- Engineered prospecting pipelines and managed client acquisition funnels across high-ticket real estate and clean energy sectors.
- Developed customer journey workflows and conversion-focused outbound scripts adopted across technical marketing initiatives.

SELECTED TECHNICAL HIGHLIGHTS

- **15+ End-to-End Systems Deployed:** Delivered scalable GHL, Skool, and Make/Zapier infrastructures achieving 30-40% operational efficiency gains.
- **Zero-Breakage Launch Records:** Instituted standardized pre-launch QA checklists across domains, webhooks, and tracking, safeguarding critical campaign deadlines.
- **Reusable SOP Frameworks:** Created standard operational templates for client onboarding, multi-branch lead distribution, and automated billing management.
